1. TITLE OF THE PROJECT PROPOSAL

STOCK MANAGEMENT SYSTEM

2. PROBLEM DOMAIN & MOTIVATIONS

Stock Management Systems can have a vast number of functionalities. Each organization has a different set of requirements. That's why a company using this software can have different features from another company using it.

3. OBJECTIVES/AIMS

➢ This project helps us to access and manage the information easily.

➢ And also helps to verify the stock currently available with them and to update the stock when necessary.

➢ This project reduces the time to search the product from the current available stock.

4. TOOLS & TECHNOLOGIES

➢ **For code we will use Code Blocks.**
➢ **The project was developed in C. C is the programming language employed.**

5. CONCLUSION
It is the best project for beginners. In this project, you can check the stock of a particular store and can search the items with its quantity. It has no graphics but can be used for practical purposes.
